

Push trolley | MLK | 500 - 5.000 kg

- The distance between the wheels is easy to adjust and can be used on many kinds of I-beams
- It can be driven in a small turning diameter
- The hinge links the left and right side plate to guarantee equal force
- It travels along the lower edge of the I-beam
- The wheels are ball-bearing for smooth operation
- Compact design, smaller body and lightweight for low headroom applications
- The trolley has an eye as attachment point

Type	MLK
Brand	Mitari
Temperature range	-10 °C to + 40 °C
Norm hoist	NEN-EN 12100-1/2
HS code	8716800000
